

Dynamic Risk Analysis(DRA)

H. Mouratidis

Security Labs Consulting Ltd.

haris@slc.ie

This project has received funding from the European Union's Horizon Europe research and innovation programme under Grant Agreement No 101120779 .

- Implements a dynamic, evidence-driven risk analysis approach.
- It delves into the technical specificities and security particularities of digital infrastructure, analyses assets' interdependencies.
- It detects all known cyber-threats and assets' vulnerabilities and estimates the likelihood (probability) that a vulnerability will be exploited.
- It assists network defenders to better prioritize the vulnerability remediation efforts, and calculates the potential cyber risks related to the underlined infrastructure.
