*"An advanced **Virtual Reality** based intrusion detection, incident investigation and response approach, for enhancing the resilience, security and privacy of complex and heterogeneous digital infrastructures."*

CyberSecDome Launches Second Open Call: €120,000 Funding for Real-World Cybersecurity Validation Pilots

The CyberSecDome project, funded by the European Union's Horizon Europe programme (Grant Agreement No. 101120779), is pleased to announce the **second round of its Open Call**, inviting proposals to **deploy, test, and validate the final integrated CyberSecDome cybersecurity platform** in real-world operational environments.

This call targets **SMEs, research institutions, and technology adopters** across Europe who can contribute to the platform's final validation and commercialisation roadmap.
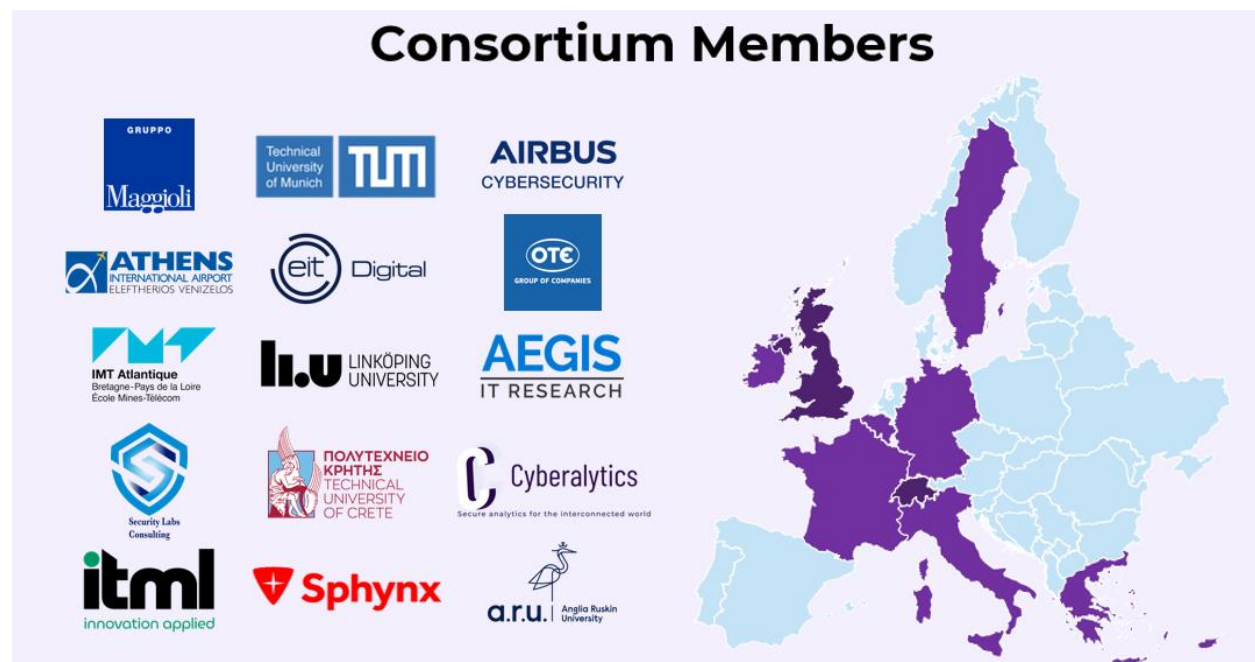

Key Details:

- **Topic**: *Full Deployment and Validation of the Final Integrated CyberSecDome Prototype*

- **Funding**: Up to **€120,000 per selected project**

- **Who Can Apply**: Legal entities established in eligible countries, including SMEs, research organisations, and other cybersecurity innovators

- **Sectors of Interest**: Healthcare, Energy, Finance, Smart Cities, Industrial IoT, Public Services and more

- **Submission Deadline**: **30 September 2025 at 17:00 CEST**

- **Application Portal**: https://www.f6s.com/cybersecdome-open-call-round-2

Proposals must outline a concrete, domain-specific use case, demonstrate the full deployment of the CyberSecDome tools (including AI-driven detection, VR-enhanced situational awareness, and dynamic risk assessment), and provide operational feedback aligned with project KPIs.
